The screenshot displays a REST client interface with a dark theme. The top bar shows a GET request to `http://localhost:5100/api/products` with a 'Send' button. Below this, the 'Body' tab is selected, showing the request body as empty. The 'JSON Content' section is visible on the left. On the right, the 'Response' tab is active, displaying a JSON array of three product objects. The status bar at the top right indicates a 200 OK status, a size of 547 Bytes, and a response time of 10 ms.

Error Handling

Passing an empty object in body

The screenshot shows the REST Client interface. At the top, a POST request is configured to http://localhost:5100/api/products. The status bar indicates a 400 Bad Request with a size of 114 Bytes and a time of 3 ms. The 'Body' tab is selected, showing a JSON request body. The response tab is also visible, showing a JSON response with an error message: "Invalid request body". The response also lists missing fields: name, price, description, and stockQuantity, and an empty object for invalid fields.
